LIAM O'CONNOR

CYBERSECURITY & SYSTEMS DEFENSE SPECIALIST

West Lafayette, IN | (765) 555-0619 | liam.oconnor@purdue.edu | github.com/liamoconnor-sec | linkedin.com/in/liamoconnor-sec

EDUCATION

Purdue University — Bachelor of Science in Cybersecurity & Network Engineering
GPA: 3.82 / 4.0 | Expected Graduation: May 2026
Relevant Coursework: Vulnerability Assessment, Network Security, Applied Cryptography, Reverse Engineering, Operating Systems

TECHNICAL SKILLS

Security Domains: Cybersecurity, Network Security, Penetration Testing, OWASP, Threat Modeling, Cryptography
Tools & Frameworks: Wireshark, Nmap, Burp Suite, Metasploit, Snort, Ghidra, Linux, Bash
Languages: Python, C++, Bash, SQL, Git

EXPERIENCE

Sentinel Defense Labs — *Information Security Intern* (May 2025 - Aug 2025)

- Conducted web application penetration testing across 12 staging services following OWASP Top 10 guidelines.
- Discovered and reported 4 high-severity vulnerabilities including SQL injection and privilege escalation flaws.
- Created customized Snort intrusion detection rules to flag anomalous egress traffic on corporate DMZ subnets.
- Drafted executive-level remediation roadmaps and validated patch deployments with development teams.

KEY PROJECTS

PacketSentry: Real-Time Network Anomaly Detector [Python, Scapy, Linux, Computer Networks]

- Built packet sniffing daemon analyzing raw socket PCAP streams for SYN flood and port scanning patterns.
- Integrated automated iptables firewall rule generation to throttle abusive IP ranges in real time.

AuthAudit: Automated JWT & OAuth Security Verifier [Python, Burp Extender, OWASP]

- Developed automated security verifier auditing OAuth 2.0 and JWT token signatures for weak algorithms; used by 800+ researchers.

AWARDS & CERTIFICATIONS

- CompTIA Security+ Certified | Team Captain, Purdue NCCDC Cyber Defense Team (Top 1% Nationally)
